SprayGro® Liquid Fertilizers

MARK GRAHAMS - ARTHURTON, YORK PENINSULA

Trident Wheat: Sown 15th June 2000 Soil pH: approx 9.2 Granular Fertilizer: 120kg/H Urea, 130kg/H DAP Foliar Applications: 1/8/00

CONCLUSION

With Year 2000 having a good growing season with more than adequate moisture high yields were achieved across the board. High levels of granular applied Nitrogen assisted crop response.

BEST Foliar crop response came via applications of SPRAYGRO CHELATED TRACE ELEMENT MANGANESE PC either as a sole application or with SPRAYGRO NITROGEN PRODUCTS-- N BLAST 42 (42-0-0) and NITRO 37 (37-0-0)

No response from Zinc foliar application--as Zinc is a typical result in this district because Zinc is not an element lacking availability in soil here.

*Application costs based on retail values 2000, with Spraygro product values at 1000 litre purchases + GST.

#Wheat value based on \$180/Tonne.
